

## Plug In Set Up Instructions

1. Start the RoadReady Solutions (fka Geowiz) App and Login
2. If it is the first time you will be presented with a software agreement. After reading it scroll to the bottom and tap accept to agree.
3. Connect the Plugin to the diagnostic port of the truck and start the engine
4. Make sure both your Wi-Fi and your Bluetooth are on for your mobile device that has the application.
5. With the button powered on it should connect passively to the Bluetooth of your device. It is a passive Bluetooth so no pairing would be involved.
6. If you wish to confirm the pairing you can go to the about page on the app located under the three lines of the home page. There it should list a plugin ID if you are connected to it.
7. If you check the Wi-Fi settings of your mobile device the numbers and letters should match the about page.

## OWNER OPERATOR ONLY Plug In Set Up Instructions

1. Start the RoadReady Solutions (fka Geowiz) App and Login
2. If it is the first time you will be presented with a software agreement. After reading it scroll to the bottom and tap accept to agree
3. Start the engine and connect the GeoWiz Plugin to the diagnostic port of the truck.
4. From the App tap the menu icon at the top left (3 horizontal lines) and select "Quick Setup"
5. Walk through each step including selecting your plugin type by picture shown on the app.
6. If it is the first time, then you would select the search for the button and it will find the button connection within range. If you are pairing a newer button go to the unpair option and then you will be given the option to search for.
7. If you wish to confirm the pairing you can go to the about page on the app located under the three lines of the home page. There it should list a plugin ID if you are connected to it.
8. If you check the Wi-Fi settings of your mobile device the numbers and letters should match the about page.
